

NOTICE OF DETERMINATION
for
EMERGENCY PROCUREMENT

7/17/18

The chlorine container at water reservoir #4 needed urgent repairs. Without the needed repairs, the City water supply cannot be chlorinated, creating public health issue.

The parts needed to make the repair are only available from TGO Technologies, making the purchase a sole source purchase. However, the City cannot afford to proceed under the sole source regulations defined by the State due to the fact that the sole source process requires a 30 day waiting period before a sole source contract can issued. For this reason, the City is electing to proceed with this purchase as an emergency purchase in the best interest of the general public and the citizens of Carlsbad. A sole source determination will be posted and approved within the next 30 days to alleviate the necessity for an emergency procurement in the future.

The City is making the determination to proceed with this purchase as an Emergency Procurement as defined in (Section 1.4.1.58-64) of the New Mexico State Procurement Code.

1.4.1.59 DEFINITION OF EMERGENCY CONDITIONS: An emergency condition is a situation which creates a threat to public health, welfare, safety or property such as may arise by reason of floods, epidemics, riots, equipment failures or similar events. The existence of the emergency condition creates an immediate and serious need for services, construction or items of tangible personal property that cannot be met through normal procurement methods and the lack of which would seriously threaten:

- A. the functioning of government;
- B. the preservation or protection of property; or
- C. the health or safety of any person.

The CPO opinion is that the emergency procurement is justified by meeting condition C of Section 1.4.1.59.

Purchase Amount \$ 6,714

Subject: **Sole Source for Secondary Containment Vessel and System for Containing and Processing Chlorine Gas from One-ton Chlorine Containers.**

Thank you for your recent inquiry concerning the TGO Technologies' containment vessel system designed for containing and processing chlorine gas from one-ton and 150-lb. chlorine containers, "ChlorTainer®."

TGO has its equipment manufactured by N. J. McCutchen, Inc., Stockton, California.

This patented system is proprietary and exclusive to TGO Technologies, Inc. There are no other manufacturers of this equipment. To our knowledge there is no known competitive product.

Please let me know if I can be of any additional assistance.

Thank you,

Rudolph S. Caparros, Sr.
Patent Holder and CEO
TGO Technologies, Inc.
